40-oz. quart "	60c

Big Increase In Car Licenses

Gain in motor licenses in this province is revealed in figures issued recently by the provincial government.

For the six months ended September 30 there were approximately 82,000 licensed passenger cars in this province, a gain of some 1,500 over the total for the whole of the year previous. Not only cars but also motor trucks showed substantial gains.

There was such an increase in car licenses this year that there was but a slight demand for licenses when they became available at the reduced 40 percent rates on October 1. This reduction has been extended to motor trucks on September 1.

Licenses taken out at the reduced rate will be good until the end of the present fiscal year on March 31, next.

For those turning in their car license plates by the end of December, 1938, there will be a rebate of

Board of Trade Sponsors Winter Entertainment

The members of the Crossfield and District board of Trade felt that they should sponsor a little entertainment during the winter months, so decided to hold a dance the last Friday in each month, beginning Friday, October 28.

The next dance will be held on November 27th, and it is hoped that our local Board will be rendered the necessary support.

Trainer's Orchestra has been engaged for this series of dances.

20 percent of the annual license fee last year these rebates amounted to about \$20,000.

Officials of the Alberta Motor Association are delighted over the increase in passenger licenses as this result was predicted by the association during its successful campaign to have the license year open on April 1 instead of January 1 in each year.

Local Board of Trade To Meet Next Thursday

All members and those interested in the welfare of the community, are asked to attend the Board of Trade meeting, to be held in the Oliver Hotel on Thursday, October 27th.

Several matters of great importance will be discussed at the meeting, and it behooves us, as citizens of this district, to be present and assist this organization in the matters now at hand.

Remember, the Oliver Hotel, at 8 p.m.; next Thursday evening. Endeavour to be there and assist in planning for the coming months.

Anglican Church Services.

At the Family service Sunday last the children and bible class received their prizes and certificates.

All the Sunday School passed the General Board of Religious Education examinations first class. Maxine Reeves received a gold medal for the highest standard in the Dominion of Canada. Barbara High and Donnie Stevens also were awarded a special prize for very high standing.

These latter prizes have not yet come to hand, as they come from the Religious Tract society in London, England.

East Community Hall.

At a meeting of the Floral Local U.F.W.A. held at the home of Mrs. Harold Robinson on Wed. Oct. 12th it was decided by the Local to Sponsor a series of entertainments to be held in East Community Hall, the first of which will be a dance on Friday Oct. 21st.

These entertainments are to raise money to paint the Hall, and the U.F.W.A. solicit the patronage of the entire district in their efforts. So let's all co-operate and turn out to the first dance on Oct. 21st. Hall's Old Time Orchestra. The date of further entertainments will be announced later.

Harvest Festival.

A large crowd turned out to the evening service for the annual Harvest Festival of the Anglican church. The church was more beautifully decorated than ever. It must have been a labour of love indeed, and very many thanks are due to those who provided the materials, and to the J.W.A. and ladies who did the labour.

Well known hymns were sung, as well as a solo by Miss Haste of the Acme district.

The special preacher was the Right Rev. L. Ralph Sherman, Bishop of Calgary, who preached a very thought-provoking sermon.

Precipitation Report for August and September

The precipitation that has occurred during the months of August and September in Alberta, weighted for wheat acreage, has been 93 ps. of the normal. Saskatchewan, 98 ps. of the normal and Manitoba 87 ps. of the normal, giving a figure for the three provinces, weighted for wheat acreage, of 91 ps. of the normal.

In Alberta, crop districts 4, 15 and 17 are considerably below normal and crop districts 3, 8, 12, and 13 considerably better than normal. In Saskatchewan, crop districts 1 and 2 are well below normal whereas crop districts 4, 7 and 9 are considerably better than normal. In Manitoba, crop districts 2, 3, 4, 5, 6, 7, 8, 9 and 14 are much below normal and only crop districts 10 and 13 are better than normal.

The precipitation which occurs in the fall months of August, September and October (between harvest and freeze-up) usually all penetrates into the ground and is available for the next crop. Records show that this rain has an important bearing on the production of the succeeding crop.

There is of course a possibility that any deficiency that has occurred might be made up by better than normal rains during the present month of October.

Local United Church Combined Services

The 33rd. Anniversary of the Crossfield United Church was celebrated on Sunday, October 16.

The afternoon service was conducted by the Pastor and Rev. Douglas Telfer, M.A., B.D., of Wesley United Church, Calgary, preached a very inspiring sermon on the building of the walls of Jerusalem, where a man urged his followers to renew their efforts to complete the wall surrounding the city, and followed his discourse down to the present time, mentioning several men who had attempted what at that time was thought to be unsurmountable obstacles, yet had conquered and brought to a successful issue what they had in view.

A large congregation gathered to listen to the Rev. Telfer, and did not go away disappointed; as his discourse was both interesting and instructive.

The evening service was conducted by the Young People's Society of the Church, when again a good congregation gathered to give encouragement to the young people of our town.

The service was of a varied character, Miss Joy Stemp opened with a pianoforte solo, followed by community singing of well-known hymns, led by Mr. Bert Pettigrew.

Miss Wilda Laut led the service and introduced Mr. Pettigrew, who is President of the Provincial Executive of the Young People's Union. He brought greetings from the Young People of the United Church in Alberta.

Lila Havens acceptedly read the scripture and Edna Ableman sang a pleasing solo.

Miss Audrey Freeze, Calgary, brought an inspiring message from the United Church Youth Congress of last June, and challenged young people to enter the Quarter-Million Fellowship of the church.

Obituary.

HENRY KIMMEL.

Henry Kimmel, farmer at Crossfield for the past 17 years, died Monday morning in a Calgary hospital after a long illness. He was born in Krafr, Russia, 64 years ago. Mr. Kimmel was a member of the Moravian Church, Carstairs.

He leaves his wife, Elizabeth; two daughters, Mrs. Guy Severns, Sunnyslope, Alta; Lydia, Crossfield; six sons, Bavard in Nebraska, Gottfried, Sunnyslope; Charles, Fredrick, David and George, at Crossfield; two brothers, Jack, Calgary, Carl, Torrington, Alta; and 13 grandchildren.

Funeral services will be conducted by the Moravian Church, Carstairs, today, Thursday, at 2 o'clock, with the Rev. Wm. F. Kroening officiating. Jacques Funeral home has charge of funeral arrangements.

A Lesson From Europe

If the recent crisis in Europe has taught Canadians anything, they must surely have learned the value of unity, in which it is truly said, lies strength. The fate of Czechoslovakia in the past few weeks has demonstrated to the entire world the truth of the old adage, "United we stand; divided we fall."

There is no gainsaying the statement that had it not been for internal dissension between the elements comprising the population of Czechoslovakia, Hitler would have had no good ground for taking the steps which have resulted in the dismemberment of the 20-year-old central European democracy.

Including, as its boundaries do—or should we say, "did"—a number of racial minorities, Czechoslovakia would have been an unpaired entity today had the views and aspirations of these minorities been welded into an homogeneous whole with those of the Czechs and Slovaks themselves.

Had it not been for the dissension within the Czechoslovakian borders the German chancellor would have had no reason for intervening that would have stoked the test of world opinion, and likewise Chamberlain of Great Britain and Daladier of France would have had no reasonable excuse for according to Hitler's demands, which would they have had the support of their constituents at home in so doing.

It would be as well for the people of Canada, secure though this country may seem from "outside" interference at the present time, to heed the lesson which may be learned from recent history as exemplified in the partitioning of Czechoslovakia, and to remember that a house divided against itself is destined to be sooner or later.

Outstanding Difficulties

While there may be little reason to fear serious division in the country on racial lines, there is a danger of ideological differences becoming accentuated unless a spirit of tolerance permeates the views of the people in different sections of the country. The growth of political, economic and social cults and "isms" sometimes leads to serious divisions in viewpoint and may culminate in regrettable decisions and actions, unless the great majority refuse to be stampeded from an attitude of clear reasoning and patient analysis.

Apart from these differences in ideals and ideas of a political, economic or social character, Canada faces other difficulties which must be overcome if the foundations upon which a united people were built at the time of Confederation are to endure and this country is to take its place in the sun as a virile, powerful and happy national entity.

These difficulties, not necessarily insurmountable, were recently enumerated by Dean F. C. Cronkite of the University of Saskatchewan, addressing a school teachers' convention, in support of his contention that constitutional changes are needed if the unity of the country is to be preserved, as follows:

The Maritime problem occasioned by dissatisfaction of the Maritime provinces with Confederation; the geographic problem due to the immense area and unfortunate geographic divisions; the difficulty of district regional economies typified by the agricultural west and industrial east; conflicting racial philosophies as seen, for example, in the neighboring provinces of Quebec and Ontario; and, finally, the financial ascendancy of Ontario, where the great bulk of the nation's wealth is at present concentrated.

Patience Is Needed

One has only to read this list of obstacles to perfect unity to realize the immensity of the problem which has to be solved if this youthful nation is to realize the vision and ambitions of the Fathers of Confederation. They can be achieved to the full but only by the exercise of courage, clear thinking and a determination to reach the goal by the safe and sane methods which experience has taught are the only assurance of ultimate success.

It is to be hoped that the Rowell Commission on Dominion-provincial relations, when it reports its findings, will be able to point the way to a successful solution of these problems, and in the meantime a little patience must be exercised in anticipation that this hope will be realized before very long.

To Restore Eyesight

People Are Urged To Will Their Eyes To Science

Persons were urged to will their eyes to science in order to restore the eyesight of other individuals.

Dr. Ramon Castroviejo, of New York City, author of the proposal, said the eye surgeons frequently can bring back the sight of persons who have suffered injuries to the cornea or front covering of the eye.

In many cases, however, the tiny pieces of cornea tissue necessary for grafting a new window into the eye are not available for replacement.

These tissues can be obtained from the eyes of stillborn infants or from corpses if the operation is done soon after death, Dr. Castroviejo said. The latter source is the more reliable, he added.

It is possible to preserve the eyes in usable condition for several days, he explained. Thus it would be possible to keep a supply on hand in the hospital refrigerator and to co-ordinate the number of operations with that supply.

Hong Kong is not a city but a small British island colony off the China coast.

Mountains on the moon are measured by the lengths of their shadows.

GET QUICK RELIEF FROM COLDS

At the first sign of a cold, rub a little Mentholatum in the nostrils. See how this healing balm quickly penetrates to the nasal passages... relieves sore throats, soothes inflamed membranes... clears nose and head... brings quick, lasting relief overnight. Get a 50-cent tube of jar of Mentholatum today. Relief guaranteed or money back.

Education And Workers

Persons Living In Prairie Provinces And Their Classification

Persons living in the prairie provinces with less than a high school education are found chiefly in agricultural pursuits and in semi-skilled and unskilled occupations, the Dominion bureau of statistics reported in a census bulletin.

Clerical and kindred workers and skilled artisans include a larger proportion of persons having attended school from nine to 12 years or, roughly, with a high school education. Those with 13 years or more of schooling, most with college education, are engaged largely in professional, commercial and clerical pursuits. Almost two-thirds of the males reported less than nine years' schooling. Only about two-fifths of females fell in the same class.

Had To Get Home

For five days Ralph Pastalis lay semi-conscious at the base of a 30-foot cliff from which he had fallen. Then the 58-year-old farmer recovered sufficiently from head injuries to crawl to a neighbor's home. Taken to hospital at Olympia, Wash., Pastalis declined to remain there, explaining he was away behind his farm chores.

Make Good Citizens

The more one talks with Canadians who come from Germany or Italian stock, the more one is led to realize that while these people love the people and culture of the lands of their origin, and rightly so, they regard with abhorrence the political creeds which are now in ascendancy in Italy and Germany.

Equal In Last Analysis

But Girls Cut Their Teeth Earlier In Life Than Boys

Age for age, girls have more teeth missing, filled or decayed than boys, it was concluded in a report on a United States Public Health Service study.

This is not simply because they are girls, according to Dr. Henry Klein and Dr. Carroll E. Palmer, who made the study, but rather because a girl's teeth are cut earlier in life than a boy's and have, therefore, been exposed longer at the same age to wear, tear and germs. In the last analysis, however, the girls show no greater susceptibility to dental decay than boys.

Continuing their dental studies with students attending the municipal elementary schools of the small urban community of Hagerstown, Md., the doctors gathered the present data from examinations of 2,232 boys and 2,184 girls.

SHE WAS A VICTIM OF HEADACHES

Kruschen Got at the Cause

This woman's headaches were of the gripping kind that reduce the sufferer to something like helplessness. She tried tablets. She tried pills. All without avail. Only Kruschen could help her.

"I used to get very bad headaches," she writes. "No tablets or pills of any kind could relieve them. One morning, casually, I tried Kruschen Salts in a glass of hot water. I continued taking it, but it was not one of those awful headaches since. Kruschen salts me better than anything else I find it very good."

Headaches can nearly always be traced to sluggishness of the kidneys, liver and intestines, and to the unsanitary retention in the system of stagnating waste material which poisons the blood. The numerous salts in Kruschen stimulate the internal organs to healthy, regular action so that no clogging waste is allowed to collect. Your inside is kept clean and serene. And that is just how Kruschen Salts brings quick and lasting relief from headaches.

United States Cattle Quota

Canada Has Not Yet Supplied Full Amount This Year

The United States quota for Canadian cattle for 1938 will permit entry of 155,799 head of 700 pounds or more, 51,933 calves of less than 165 pounds in weight, and 20,000 dairy cows. To September 3, Canada had supplied 34,076 head, or 21.9 per cent of the heavy cattle, 32,610 head or 62.8 per cent of the calves and 4,288 head or 21.4 per cent of the dairy cows. By August 28 of last year, the quotas of both the heavy cattle and the calves had been filled and that of dairy cows 20 per cent used up.

Described In One Word

Easy To Tell What President And Dr. Dafoe Talked About

Dr. Dafoe went to Washington to visit the White House. Although Dafoe had been allotted a five-minute visit he was closeted with the President for almost half an hour. When he emerged, his publicist tried to ascertain the substance of their conversation, to deliver it to the press for exploitation. Dafoe refused, insisting that it was extremely confidential. After lengthy pleas, the distraught press agent shrieked: "Can't you tell me a word about it?" "One word? Yes," replied Dafoe. "Babies."

Is Skilled Pilot

Major Smith Landed Airplane On Deck Of Warship

Major C. H. Chichester Smith, who arrived in England from Canada after taking part in the international competition for 14-foot dinghies on the Canadian lakes, was one of the first men to land an airplane on the deck of a warship. A skilled pilot, he also organized the Naval Air Mission to Greece after the war, and in 1921 accompanied Lord Bessillip on his air mission to Japan, at the request of the Japanese Navy, to undertake the organization, equipment and training of its Naval Air Service.

No newspaper reporters were present when the Wright brothers first flew, and when the story finally did reach the newspapers, very few people believed it.

Leaf beetle larvae get fresh air by breathing several feet under water by thrusting their heads into the air spaces of lily stems.

Greenland, at the present time, is moving away from Europe at the rate of about 50 feet per year.

The cricket's note sometimes is so loud that it can be heard a mile away.

Canada's First Moslem Church

Modest Structure Of Brick Vener To Be Built In Edmonton

The First Moslem church in Canada will be at Edmonton. The building permit says the owners will be the Arabian Moslem Association there. It will be a modest one-story 30x50 structure of brick veneer on 10th avenue. It will be striking to find if the congregation are all Arabs for the Moslems cover a diverse number of nationalities. Of course, even in Great Britain, there have been substantial conversions to Islam and they have their mosques, so that it is surprising Canada has not before this had some churches of that faith. Venerably, there are 30 differing creeds in Canada and too many perhaps in serious competition. The census says there are two thousand professing Mohammedanism in this Dominion. But Islam, founded by prophet Mahomet about 600 A.D. at Mecca, has a world membership of 209,000,000, which is about 3,000,000 greater than that of Christian Protestantism and 125,000,000 less than Roman Catholicism.—Brandon Sun.

SELECTED RECIPES

CORN STARCH CAKE

1 cup white sugar
1/2 cup butter
3 eggs
1/2 cup S. Lawrence or Durham
1/2 cup corn starch
1 1/2 cups flour
3 cups milk
1/2 teaspoon baking powder
1 teaspoon lemon flavouring
1 teaspoon salt
Cream butter and sugar until light. Add well-beaten egg yolks. Mix well. Add milk alternately with sifted dry ingredients. Add flavouring and beat well. Fold in stiffly beaten egg whites. Bake in two layers, 20 to 25 minutes, moderate oven.

JELLO PLUM PUDDING

1 package lemon or cherry Jell-O
Dash of salt
1/2 teaspoon cinnamon
1/2 teaspoon cloves
1/2 cup raisins
1/2 cup finely cut raisins
1/2 cup finely cut cooked prunes
1/2 cup finely cut citron
1/2 cup finely cut nut meats
1/2 cup Grape-Nuts
Combine Jell-O, salt, and spices; add water or stir until Jell-O is dissolved. Chill. When slightly thickened, fold in combined fruits, nuts and Grape-Nuts. Turn into mold. Chill until firm. Unmold. Serve with foamy sauce or with whipped cream flavored with nutmeg. Serves 10.
Note: One-fourth cup brandy may be added with fruits, if desired.

Satisfactory To Designers

United States New Airliner Has

Planned At All Points. The plant new airliner, 42-passenger Douglas C-4, in 46 test flights has exceeded the predictions of its designers, it was announced at Santa Monica, Calif. The sky leviathan was built to the order of the United States airlines at a cost of nearly \$2,000,000.

Tests gave these results: The guaranteed high speed of 240 miles an hour was exceeded by a comfortable margin.

On four engines, during "aw-tooth" climbs, the plane rose above 25,000 feet with a full load.

On three engines a plane reached a ceiling of 20,000 feet.

The plane is 139 feet, three inches, from tip to tip, and 97 feet long.

Expert Player Miner

Earnings Of Blind Youth Sometimes

Reach \$3.00 A Day. Welton Benton, 24 years old, has not let blindness prevent him from becoming an expert player miner. The blind youth, since going to the Black Hills, near Mystic, South Dakota, with his parents in 1934, has constructed a huge water wheel, sluice boxes, laid several hundred feet of railroad track for his small ore car and tunneled into the hillside not far from his home. He doesn't need to see the flakes of gold when they are in riffle and pan. He can tell by the weight of the mineral and its sound when scratched with tin or rock. His earnings total from 50 cents to as high as \$3 a day.

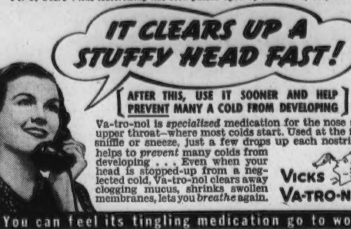

The Utah Salt Flats

Extend For 200 Miles And Surface Is Very Hard

The salt flats near Salt Lake City, where John Cobb set up a new world's land speed record only to lose it a day later to Capt. Eyston, form a vast amphitheatre 300 miles in extent. The surface is so hard that wooden stakes have to be ironed before they can be driven into it. The salt is, however, quickly cut into furrows by heavy cars travelling at high speed and has to be levelled by scrapers as soon as the car has passed. Mr. Cobb is a fur broker in London. Speed driving is his hobby.

Many a man's future is no further away than the front of his car.

For 21 Years Vicks Advertising has been passed upon by a Board of Physicians

IT CLEARS UP A STUFFY HEAD FAST!

AFTER THIS, USE IT SOONER AND HELP PREVENT MANY A COLD FROM DEVELOPING

Va-ro-nol is specialized medication for the nose and upper throat—where most colds start. Used as the first sniffle or sneeze, just a few drops up each nostril, it helps to prevent many colds from developing... Even when your head is stopped-up from a neglected cold, Va-ro-nol clears away clogging mucus, shrinks swollen membranes, lets you breathe again.

VICKS VAPOROL

You can feel its tingling medication go to work

Make Good Living

Progress Made By Denmark Farmers

In Last 150 Years

In 1788, states the Montreal Gazette, the peasants of Denmark won their freedom from the old system of villeinage under which their very little better than workers for the great land-owners. This year the farmers and all other citizens are celebrating the 150 years of liberty and discussing with justifiable pride the progress that has been made in the century and a half. After the breaking-up of the estates the land was divided into farms, small as compared with the farms of North America but astonishingly productive and self-supporting for the families that work them.

Agriculture is the primary activity and Danish products find favor in the British and Continental markets. Exports of butter, eggs and high-grade bacon bring much wealth to the Danes on the land and there is a constant effort to retain the foreign markets.

The average farm is 15 acres and the farmer, his wife and children do all the work. With a half dozen or more cows, a couple of score of pigs, a horse or two and many hens, the family makes a fair living on the land, which also provides most of the food for the animals.

This is intensive and intelligent farming, to which the government lends every encouragement in the way of loans, which also are managed intelligently. There is no fixed interest rate for these farm loans, the practice being to charge a fair rate when crops are good and a low rate when they are poor and a low rate when they are poor and a low rate when they are poor.

Through the co-operative societies, which have reached a high state of efficiency in Denmark, marketing of products at home and abroad is a comparatively easy matter. The farmer also buys many of his supplies through these co-operatives and is quite satisfied with his returns.

There being no coal in the country, dependence is on agriculture rather than on manufacturing and other industries. The government, accordingly, concerns itself chiefly with bringing about farm improvements and with reclaiming marsh and wooded land. As for the beach and other forests, when a tree is cut another is planted, with a view of maintaining the wood wealth.

The 200,000-odd farmers in the population of 3,500,000 or thereabouts seem to be doing well with the liberty to work for themselves that was won in 1788.

A machine for locating thunderstorms and reporting them by radio, has been perfected at the Melbourne University, Australia.

The average life span of a tortoise is approximately a hundred years.

A barrel of crude petroleum yields about twice as many gallons of gasoline today as it did 16 years ago.

The latitude of the north star always is the same as the latitude of the observer.

All over China written Chinese is the same, but every province, or even district, has a different pronunciation.

New Use For Radio

Can Illuminate The Sky As Brightly As The Full Moon

A new use for radio, to light the sky 50 miles overhead as brightly as the full moon does, is proposed in Nature, British official science journal.

The new light would be an artificial aurora. A single radio station could cover a patch of sky 80 miles in diameter with its light. It would illuminate country roads as well as ordinary lighting systems would and could be used anywhere.

Two radio stations, WJW at Cincinnati, and RV-1 at Moscow, already have the power to make the preliminary tests, says the author of the proposal, Dr. V. A. Bailey of the University of Sydney.

The principles of the new light are already in operation in laboratories, Dr. Bailey says. One is the glow discharge lamp. Without wires or current, if placed in an electrical field, it gives a brilliant light from gas in the bulb which becomes "excited" by electricity.

The other principle is that of building up vibration by oscillation, like a child's swing that goes higher with each push.

Dr. Bailey says if properly chosen radio waves are sent up against the ionized layer of air known as the "E" layer, which reflects broadcasting signals around the world, the air itself would glow the same as the gas-filled laboratory lamp.

This is because the peculiar "E" layer contains free electrons which Dr. Bailey says are known to be gyrating at a fixed rate. If the radio beam is timed to synchronize with these gyrations, he declares, the electrons will speed up enough to emit light.

Swing Music

Canadian Composer Says Jazz Is Due To Jittery Nervous Life

Sir Ernest McMillan of Toronto, Canadian composer and symphony conductor, claimed at Vancouver that "jitterbug", "jam sessions" and swing music were nothing new.

All popular present day music is derived from negro rhythm, said Sir Ernest. He did not believe "swing music" would be very permanent. "Jittery" music is probably the result of the "jittery" nervous life people lead to-day," he said.

Quite Simple

Painter: But, madam, how can I paint a portrait that resembles you from these two photographs? One was taken in 1910 and the other recently."

Lady Client: "Oh, I thought you could take the face from one and the dress from the other."

In Siberia, in 1908, winds from a meteor blew down forests over an area of 100 square miles.

The latitude of the north star always is the same as the latitude of the observer.

About 7,000 persons are drowned in the United States each year.

WELL... I MUST BE GOING HAVE A CASH, FIRST OK, DON'T GO TO ANY TROUBLE WILL JUST SAY THE REFRIG. M-M-M THESE BITS ARE GOOD! HOW COME THEY'RE SO... THE WIFE WRAPS THEM IN PARA-SANI... IT'S REALLY THE TRICK HEAVY WAXED PAPER

APPLEFORD PAPER PRODUCTS LTD. WAREHOUSES AT WINNIPEG - REGINA - SASKATOON - CALGARY - EDMONTON

TO DELVE INTO MARKETING OF WESTERN WHEAT

Winnipeg—Premier John Bracken of Manitoba announced his government would move shortly for an international conference on the marketing of western agriculture products. The meeting would be held in Winnipeg, the date to be set later.

Mr. Bracken said outstanding Canadian and United States authorities would be invited to attend and special emphasis would be placed on the problem of marketing wheat. The conference also would consider the marketing of cattle, hogs, butter, honey, poultry products and fish.

It is hoped representatives of leading wheat-exporting countries and an authority on European markets will be able to join discussions.

The price situation which now exists warrants the most serious consideration of every Canadian, the premier said in announcing the conference. "With No. 1 Northern wheat worth a little over 60 cents per bushel, only seven cents a bushel more than the average for 1932-33, the worst year that we experienced during the depression, the future trend of prices and markets and what to do about them becomes of paramount importance."

"In terms of gold, present prices for wheat are not very far away from the levels established at the low point of the depression in December, 1932. The 60-cent price for wheat this year established by the wheat board and the Dominion government has saved western Canada. But what of next year and the years that are to follow? The situation is a challenge to western agriculture and a challenge to the nations as a whole."

"Adequate markets for our surplus agricultural products are absolutely essential to the economic well-being of Manitoba and other western provinces and the Manitoba government feels that the time has arrived when the whole question should be considered in the light of our experience since 1930, and in the light of more recent developments."

"The situation is forcibly brought home to us in western Canada this year when larger wheat crops in the United States and Canada, and fairly substantial production elsewhere, have not been accompanied by a corresponding improvement in international demand for wheat, with the result that prices are now about half the level of a year ago."

"The economic development of Manitoba and of western Canada has been such as to yield large export surpluses of farm products and to project the west extensively into the field of international trade and commerce. We must give much more serious consideration to our export position and the basis of our trade with other countries."

"The conference will not be restricted to wheat but will include consideration of the problems associated with marketing surpluses of cattle, hogs, butter, honey and poultry products and fish. Outstanding Canadian and United States authorities will be invited, as well as representatives from the other leading exporting countries, and if possible an authority on European markets."

Gas Price Reduction

Would Save R.C. Consumers \$500,000 A Year

Victoria—British Columbia consumers will save roughly \$500,000 a year for every one-cent reduction in gasoline price ordered by the provincial fuel commission, an unofficial estimate indicated.

Dr. W. A. Carrothers, former University of British Columbia professor and chairman of the fuel commission, said he would order a reduction in gasoline prices within 10 days. The order is subject to approval of the provincial cabinet.

Plan Operating Again

Ottawa.—The farm placement scheme that last fall and winter put 42,000 persons, the vast majority single men, on farms in Canada's four western provinces is operating again. Placements this year are expected to be reduced considerably because of the generally brighter western picture.

Reminder From Britain

London.—The British government has repeated its "reminder" to Japan that British commercial interests in Hong Kong and southern China must be respected. The British ambassador at Tokyo, Sir Robert Craigie, informed the Japanese foreign office of the British attitude "within the past few days."

Warning From Japan

Ask Britain And U.S. To Give Her Free Hand In China

Tokyo.—The Japanese government urged Great Britain, the United States and other powers to "refrain as far as possible from moving troops, warships and aircraft in south China" in view of the landing of a Japanese expeditionary force, presumably for a drive on Canton.

Notes were sent to the Tokyo embassies of the principal powers asking for co-operation in prevention of incidents in connection with the south China campaign.

The notes designated the area between Swatow, 200 miles northeast of Hong Kong, and Pakhoi, about 350 miles southwest of that British colony, as the area in which neutral powers were to refrain from moving their forces. Japan asked that 10 days' notice be given the Japanese command if "sheer necessity should compel" such movements.

Statements issued by the foreign office expressing the hope the powers will show "good sense" in keeping hands off Japanese activities in the south were regarded as directed primarily at Great Britain, who for more than a century has been the dominant foreign force in the Pearl River valley, economically controlled and dominated by Hong Kong.

At the navy ministry no effort was made to conceal the fact the new campaign will be on a major scale and will involve large forces of the Japanese army, navy and air force.

The foreign office spokesman said today Japan hoped the powers would control the movements of their own war vessels in the new war zone and expressed hope no "complications" would ensue.

There was some reason to believe the Japanese hoped for a rapid and relatively painless conclusion to the southern campaign. That is why they officially termed it a "purely military" operation, signifying thereby they do not intend to occupy south China permanently, as they have attempted to do in the north.

Forest Fire Havoc

Death Toll In Ontario And Minnesota Placed At 20

Fort Frances, Ont.—Flaming forest fires filled the night sky with a red pall of smoke over northwestern Ontario as fresh outbreaks caused anxiety to nearby fire fighters. But forestry branch officials said the menace, which already claimed 20 lives, is under control.

Eight women and 25 children were housed in a hotel at Stratford, 40 miles west of Fort Frances, after they were advised to leave their homes. They will remain outside the danger zone until the menace is past.

A report said the town of Devils, 25 miles west of Fort Frances, was threatened by a fresh outbreak but provincial police here said their information was that Devils was in no danger.

The menace cut a swath 60 miles westward from Fort Frances and 30 miles deep, stretching into northern Minnesota. Hundreds of thousands of dollars' worth of timber and cut pulpwood went up in flames. Beautiful farm homes, settlers' cabins, schools and stores are mere clumps of ash.

Four bodies were found on the burned-over ground in Dance township, bringing the death toll in Ontario and Minnesota to 20. Twelve young children, three mothers and two men died in Dance township, 50 miles northwest of Fort Frances and centre of the holocaust.

Russia's New Defence Line

Is Being Constructed Along Western Frontier, States Report

Washington.—Reliable reports that Russia is hastening construction of a vast artificial no-man's-land along its western frontier as a first line of defence against Germany have reached diplomatic circles here.

The information is that Russia, seeing the collapse of their efforts to force an international barricade eastward around Germany, have dropped everything else in order to protect the Ukrainian wheat and coal fields from invasion.

A six-point program designed to slow down and finally halt an approaching army have been dovetailed into natural defences of distance and lack of communications.

Plans Apartment Centre

Winnipeg.—Plans for a low-rental apartment centre, comprising 474 suites and costing about \$1,400,000, were outlined by Mayor John Green in a service club address. The scheme, Mr. Green said, would be financed by loan from the Dominion government, and Winnipeg would take 35 years to pay for the building. Mr. Green's plan will be submitted to city council.

To Prevent Rust

Dusting With Sulphur Results In Higher Yields

Winnipeg.—Sulphur dusting of test plots of Thatcher wheat to prevent rust, resulting in higher yields and better grades, was outlined here before the annual meeting of the committee on grain standards.

Dr. W. F. Geddes, grain research chemist of the board of grain commissioners, and L. H. Newman, Dominion cerealist, Ottawa, outlined the experiment, reporting the favorable reaction and improvement in color of Thatcher wheat, a rust-resistant variety.

Dr. Geddes said control of export standards of Canada's wheat has improved in the past two years and attracted favorable attention overseas. The crop this year is more uniform and better balanced than last year's crop, when drought effects were marked.

Ripened kernels characterized by a bronzy or brassy color was a peculiar condition found this year in wheat susceptible to stem or leaf rust, he said. The sulphur-dusting experiment improved color.

NEW FRONTIER IN CZECHOSLOVAKIA BEING DETERMINED

London.—An official map received in London disclosed Chancellor Hitler had carried his new frontier with Czechoslovakia forward to lines corresponding roughly to those of his predecessor map which Prime Minister Chamberlain refused to accept.

The new frontier gives Germany an area approximately equal to that of the Godesberg demands, although only in a few cases do the lines coincide with the Godesberg lines. There are variations of five to 10 miles either way throughout, some favoring the Czechs as compared with the Godesberg map, others favoring Germany.

At the Munich conference and afterward it was asserted in British quarters that Hitler had not gained all he asked of Mr. Chamberlain at Godesberg on the Rhine on Sept. 22. The big four at Munich—Hitler, Chamberlain and Premiers Daladier and Mussolini of France and Italy—turned over to the commission the task of drawing the limits of the fifth zone. The commission consists of a German foreign office official as chairman, the British, French and Italian ambassadors to Berlin, and, technically at least, a Czechoslovak envoy.

Germany's biggest gain, according to the commission's map, was made north of Prague, where the final settlement puts the border only 25 miles from the Czechoslovak capital and 10 to 15 miles south of Godesberg line.

On the other hand, the Czechs gained near Pilsen, where the frontier will not enter the actual town as it was expected to do. Similar changes from the Godesberg line favoring Czechoslovakia appear all along the south and southwestern frontier.

Another German gain is to the west of Machisch-Ostau. In northern Moravia, where the line passes through a large area in which Hitler originally demanded a plebiscite.

The feeling is growing in informed London quarters that Germany might be satisfied with the Czech concessions already embodied in the fifth zone, and that plebiscites in additional territory might be waived.

The commission's map, however, showed areas in which plebiscites might be held.

ROYAL TOUR

KING GEORGE VI

The King and Queen plan to visit Canada early next summer and spend about three weeks in the Dominion.

Seeking Trade Agreement

Germany Anxious To Negotiate For Treaty With United States

Ankara, Turkey.—Walter Funk, German economics minister, announced he intended to start negotiations with United States. Funk left for Berlin after concluding a trade agreement with Turkey.

In line with Germany's effort to line up southeastern Europe into her economic orbit, Funk negotiated a German credit of 150,000,000 marks (approximately \$60,000,000) for Turkey.

Germany expects to supply materials for new railroads in eastern Anatolia and for new factories for production of munitions, seaplanes, heavy chemicals and synthetic gasoline.

The German agreement with Turkey rivals an earlier credit of £16,000,000 (\$80,000,000) granted Turkey by Great Britain before the Munich agreement dismembering Czechoslovakia.

Washington.—Officials handling United States foreign commerce said the United States would welcome a trade agreement with Germany, but not on the basis of the German system of trade.

Looking Forward To Trip

King George And Queen Elizabeth Anxious To See Canada

Ottawa.—The King and Queen are "greatly looking forward" to their visit to Canada next summer, his majesty said in a reply to a cable from Lord Tweedmouth expressing the joy of the Canadian people in the coming visit. The messages were made public here.

The Governor-General cabled the King:

"The Prime Minister has asked me to send to your majesty and to her majesty the Queen, with my humble respect, an expression of the great pleasure felt by himself and his colleagues at your majesty's gracious consent to visit Canada next year. The Prime Minister wishes me to assure your majesty that this news has been received with the most profound gratitude and joy by all your majesty's subjects in Canada."

The following reply was sent from Balmoral Castle:

"The Queen and I much appreciate the message from the Prime Minister conveyed by you. Please assure him that we are greatly looking forward to making the acquaintance of Canada and her people."

VETERAN WESTERN PUBLISHERS

Veterans in Canada's weekly newspaper field are these two Saskatchewan editors. On the left is 74-year-old Donald Dunbar, editor of the Estevan Mercury since 1905; his companion is James Stoddard, 66, editor of the Tuganoke Globe. Both got their start in Ontario. Mr. Dunbar as a writer and Mr. Stoddard with a Prescott weekly paper. This photograph was taken at the convention of the Saskatchewan weekly newspapermen in Regina.

To Reduce Expenses

Main Shops Of C.P.R. To Be Closed For Period Of Three Weeks

Montreal.—Main shops of the Canadian Pacific Railway Company throughout Canada will be closed for three weeks, Oct. 24 to Nov. 14, it has been announced.

The decision was disclosed in a brief statement made public by the company:

"After a conference between the company's officers and representatives of its shop employees throughout the system, an amicable agreement was reached that all main shops will be closed for a three-week period—Oct. 24 to Nov. 14—rather than to effect reduction in working forces at the present time."

The announcement was made following a closed conference between company officials and representatives of 13,000 unionized shop employees who had been advised of plans for a part-time layoff to reduce expenses.

Committed For Trial

Leeds Telephone Operator Charged With Turning In Air Raid Alarm

London.—A telephone operator, Wilma Wood, 26, was committed for trial at Leeds on a charge of public mischief—specifically telephoning a secret code warning of an "air raid" in the recent international crisis. Thousands of defence workers piled up around midnight the night and 60 air raid precautions centres, police stations and fire departments of West Yorkshire prepared for action. The summons was a hoax.

NAZI WARNING ABOUT METHODS OF CARDINAL

Vienna.—Nazis warned "an end must be put to the methods of the Austrian Cardinal Innitzer." The warning was published in the Nazi organ, Wiener Neueste Nachrichten, under the signature of the paper's managing editor, Walter Petwidale.

"Now at last an end to the Innitzer methods," said the leading article's headline which ran across the first page.

It was the first editorial cognizance Nazis have given of Cardinal Innitzer's sermon and the subsequent storming of his palace which resulted in broken windows, much exterior damage, a wound to the cardinal from a thrown stone, and injury of one of the canons.

The same newspaper made the first reference in Vienna newspapers to "the incidents on Saint Stephen's Place" in a paper of a Nazi party meeting speech by Burgomaster Hermann Neubacher. The burgomaster rebuked the cardinal for a remark that there still are young people who are not as easily tempted to listen to deceitful catchwords and hypocritical rhetoric."

Neuste Nachrichten's sharp attack said:

"We are going on our way even without the consent of the last adherent of Austrian clericalism who has not found his way over in these times. We do not intend, however, to permit ourselves to be continuously in a state of anger. An end must be put to the methods of the Herr Cardinal who first shows a velvet hand in readiness to talk things over and then incites political quarrels."

This was taken as a reference to Innitzer's visit to Chancellor Hitler immediately after Anschluss of Austria and Germany last March and his letter to Nazi officials which he signed "Heli Hitler"—a departure from the custom of German bishops. He also urged Austrian Catholics to vote for Anschluss in the plebiscite that followed.

"We do not wonder that people reacted with loud ill-humor" to the cardinal's sermon, Neuste Nachrichten went on.

"It is especially bitter to us that a high Catholic dignitary showed such courage to attack the Fuehrer in an indirect way in a speech before a couple of dozen anemic Catholic youth, organized a silly apothecary and provoked the people at the very moment our troops were taking possession of the Sudetenland—at last liberated by the Fuehrer—in the name of the reich and the German community."

The editorial was not the only evidence of Nazi displeasure.

The last issue of the Kirchliche Wandzeitung, a diocesan publication displayed on bulletin boards outside churches, was seized. No reason was given for the confiscation. The one-sheet paper usually contains nothing more than short notices to parishioners.

FACTORS THAT WORK AGAINST PEACE OF WORLD

Paris.—The German language weekly newspaper Die Zukunft carried an article signed by Alfred Duff Cooper in which the former first lord of the Admiralty said Germany's Nazi regime prevented German and British people from working together for peace.

The article, featured in the anti-Nazi weekly's first appearance in Paris, said many in both France and Britain believed Prime Minister Chamberlain gave in too much to Chancellor Hitler in the Czechoslovak crisis.

"It is difficult to see how peace can reign between Christian people and the Nazis," wrote Mr. Duff Cooper, who quit his British cabinet post in protest against Mr. Chamberlain's foreign policy.

"But I believe in the bottom of my heart that peace can reign between all civilized people."

The article continued:

"The English people look to the future. They are aware that Chancellor Hitler, whose demands are increasing steadily, will some day create a situation the inevitable result of which will be war."

"The people of Great Britain feel that war can be avoided only with the aid of its real ally—that is, the German people. The people of Great Britain have no aversion for the German people, but only for the present Nazi regime, which they deeply distrust."

"The people of Great Britain are champions of liberty. . . . The British Empire is composed of men of many races and many creeds. The principle of the empire is that the same law must be applied to all men, whatever their religion or race."

"The Nazis believe there is only one race worthy of possessing the world. They have invented a race which they call 'Aryan'—that is, the 'Aryan' race, say the Nazis, has the right to persecute other races. . . ."

"The Nazis reject charity, grace and humility and declare them imported from the Orient. They condemn the race to which the founder of the Christian religion belonged and declare it unworthy of enjoying civil rights."

"It is therefore difficult to see how peace could ever reign between the Christian peoples and the Nazis. But I believe from the depth of my heart that peace can reign among all civilized peoples."

Farm School Scholarships

Awarded To 50 Young Men Chosen By Committee

Saskatoon.—From hundreds of applications received, a joint committee of University of Saskatchewan, provincial and federal men has selected 50 young men who will be awarded Dominion-provincial youth training scholarships enabling them to attend a five-month course at the university farm school this winter. Professor R. D. Ramsay announced the names of the successful contestants. He explained that the scholarship in each case would be \$150, which amount would help defray the costs of board, tuition, library and books for the students attending.

Spanish War Casualties

2,657 Italian Officers And Men Have Been Killed

Rome.—Italy announced that 2,657 Italian officers and men had been killed in the Spanish civil war from the beginning of operations in Spain until Oct. 10, and that an additional 278 had died from service casualties.

The communique listed 12,147 officers and men as killed, wounded, or taken prisoners in the war. The communique said 2,000 of the wounded were permanently crippled or made invalid.

Avon Castle Sold

London.—Avon Castle, ancestral home of the Earls of Gloucester and "rancher peer," has been sold to H. J. Colebrook, wealthy London surveyor. The purchase price is reported to be in the neighborhood of \$375,800, the original cost of the castle, which was built in 1878.

War Scarce Cost Money

London.—Emergency defence measures taken by Great Britain during the war scarce caused by the recent European crisis cost the country more than \$25,000,000 (\$15,000,000). The Evening News (Liberal) estimated.

CROSSFIELD, ALTA, THURSDAY, OCTOBER 20, 1938.

A Dominion Health Programme Essential

Referring to the coming into effect on October 1st of Ontario's law for the compulsory pasteurization of milk, the current issue of "Health" contains editorial comment that will arouse interest in all other provinces.

The Health League of Canada, of which "Health" is the official publication, has been crusading for pasteurization of milk for many years and is encouraged in its national campaign by progress in Ontario.

The Ontario Provincial Law, the editorial proceeds to say, "which forbids the sale of unpasteurized milk in all municipalities of over 1,000 population in Ontario as well as in designated areas places Ontario in the forefront of the fight for pure milk. This province becomes the largest political area in the world with a compulsory pasteurization law although Sweden will bring a similar law into effect next year. While Ontario is to be congratulated on a splendid achievement one cannot but regret that at this time organization for health in Canada is of such a character that similar legislation has not been enacted simultaneously throughout Canada. The health of Canadians is of value in whatever province they live and health conservation programmes should progress with equal speed throughout the whole Dominion.

"Deaths from poison gas and bombs may be more dramatic but children who die of bovine tuberculosis or milk borne typhoid are every bit as dead as soldiers who die of wounds even if we do not bother to build memorials to them as reminders of our own carelessness is not preventing them. Again we reiterate health is a national matter. Again we ask when Canadians will realize that health for all Canadians is essential in whatever part of the Dominion they live".

HOME CORNER.

I Know His Care,
I know where His Islands lift
There fronded palms in air;
I only know I cannot drift
Beyond His love and care,
And so beyond the silent sea
I wait the muffled oar;
No harm from Him can come to me
On ocean or on shore.
(Whittier)

HOME HELPS.

Two or three aspirin tablets added to the water, when crotches are being washed will help them to retain their bright colors.

A white straw hat that has become yellowed by the sun can be satisfactorily freshened by scrubbing it gently with a tooth brush dipped into lemon juice and sulphur (powdered). Rub the hat after wards with a clean piece of cotton wool.

Moisten gummed labels with onion juice instead of water before sticking them to tins or jars, and they will never peel off.

When opening tins of fish or fruit, turn the tin upside down, and open at the bottom instead of the top contents will slip out more easily, and the top layer, in the case of fish, is often the finest will be out top of your dish.

JOKES.

He had arrived home late, and his wife was giving him a piece of her mind. "I don't care, my dear," he said getting really worked up. "I mean exactly what I say. I'm a man who calls a spade a spade. His wife nodded. "Maybe Henry," she said with biting sarcasm, "but you don't call a club a club; you call that working late at the office."

"Did you have the car out last night?"
"Yes Dad, I took a me of the boys a run round."
"Well, tell them I found two of their lip-ticks!"

In last week's paper at the base of my Home Corner column I noticed a funny story about an "Ameri-

M-m-m-m

that FISH smells good!

DRESSED FILLETS OF HADDOCK

- 1 cup of milk
- 1/2 cup of flour
- 1 tablespoon of mustard
- 2 cups of ground old Canadian cheese
- 2 tablespoons of butter
- fresh chopped parsley

Prepare a white sauce with the butter, the flour, the mustard, and the milk; add the grated cheese, season. Wrap the fillets with a damp cloth, cut in individual pieces, cover each piece with the cheese mixture, sprinkle with chopped parsley, place on well buttered oven dish, and cook 20 minutes in moderate oven. Fillets of any other kind of Canadian Fish may be used instead of Haddock fillets.

THE KIDDEYS' EYES will sparkle when you bring in an appetizing platter of Fish. It's a dish fit for a king, with its delicious, palate-pleasing flavour... yet so inexpensive that you will have money left over for extra meal-time treats.

You can enjoy Canadian Fish and Shellfish all the year 'round—over 60 different kinds—fresh, frozen, smoked, dried, canned or pickled... as often as you wish. Many tempting recipes make it easy for you to offer delightful variety to hearty appetites.

ANY DAY A FISH DAY

Canada's Pavilion For The New York World's Fair To Express Spirit Of Country

Final architectural details for Canada's pavilion for the New York World's Fair, a modern structure designed to express the "young and virile" spirit of the country, have just been announced. Besides plans for the stucco-ornamented pavilion itself, a landscaping scheme has been perfected, featuring an illuminated pool and two totem poles.

Douglas S. Cole, Canadian Trade Commissioner, revealed the plans after receiving the details from Major J. C. Parmelee, Deputy Minister of the Department of Trade and Commerce in Ottawa. The architects, W. F. Williams and Iain R. Morrison, both of Nelson, B.C., were picked to draft plans after a Dominion-wide competition.

Fronting on Presidential Row South and the broad Court of Peace, the pavilion will be of stucco, decorated at intervals and brightened by the colored coat of arms of Canada on the front and back. The buildings will be 205 feet long, 118 feet wide and 40 feet high.

Windows will be of glass blocks, and vertical strips of colored tiles will add color between the windows. There also will be poles for many flags.

All doors will have frames of copper treated with a special material to give them an antique green effect. There will be five of these double doors at the front and canopied entrances on both sides of the pavilion. The side doors will make it possible to handle crowds with a minimum of confusion.

The Canadian building will be set back from the avenue to allow for large lawns and the landscaping. The reflecting pool, 16 feet wide and 80 feet long, will be illuminated at night by submerged colored lights and will be lined with vivid tiles. Flowers will be used liberally and a continuous flower box will surround the walls, according to present plans. Two carved, grotesque totem poles, familiar sights in Canada, will stand outside the main wing.

The color scheme for the interior has not been perfected, but it will be in harmony with the aim to depict the agricultural, industrial and economic life of the Dominion. Opportunities for investment and travel will be emphasized.

A huge map of Canada printed on burnished copper will be at the back of the main hall, in full view of the main entrance. It will show the chief activities of the country and will be illuminated by batteries of little lamps controlled from one switch-board. The operator will be able to light aviation routes, the outposts of the Royal Canadian Mounted Police, grain fields, mining sections and major cities.—New York Sun.

Nothing Settled By War

People Should Be Thankful Other Ways Are Being Tried

That the question has had to be settled at gunpoint is regrettable, but that it has been settled without another European war is something for which the nations ought to go down on their knees in thanksgiving. It is thoroughly realized now by all thinking men, settles nothing, and a new conflict, when the years of slaughter and destruction were passed, would merely present the world with new problems as baffling as those which followed the last catastrophe. It may be said with certainty that, whatever else the peacemakers did, they would not re-constitute the Czech republic as it was.—Toronto Telegram.

Roundabout Editing

Magazine Was Printed On Time In Spite Of Handicaps

Fulton Ounsler, who heads Macfadden's Liberty magazine, lives at West Falmouth, Mass. He edits the magazine from this place, although the office is in New York, by constant use of the telegraph and telephone. When the hurricane hit that sector, the wires were down and all phone and telegraph service to New York was disrupted. The phone to Boston was clear. And so Liberty magazine was edited by way of London in this way: Ounsler phoned his instructions to Boston, they went by cable to London, and then by cable back to New York.

The rich iron ore deposits of northern Michigan were discovered by William Budd, a surveyor, when his compass needle began to spin violently.

Parents are asked awkward questions by their children. Then invention is the necessity of mother.

Welcome As Visitors

Tourists Should Not Be Made To Feel Money Most Important

While we should not lose sight of the money value of Canada's tourist business, says the Engineering and Contract Record, there is the danger of emphasizing this aspect of such traffic to the point where we make the tourist feel that all we are concerned about in getting him to use our roads is his money. No tourist can proceed very far without spending money, but it is his money that he is here to spend, and the deficit expenditure of money and is welcome only in proportion to the amount of cash he spends, then he is liable to retreat post haste to his native soil and thereafter seek tourist opportunities where he can enjoy himself without the thought that he is being "made a sucker."

We sometimes fear that many a tourist feels just that way when he reads the frequent press references to Canada's \$300,000,000 a year tourist business, with always the emphasis laid on the money transactions involved. Of course, the cash value of tourist traffic is not to be overlooked, but there must be value received by the tourists for the money spent. If they are to find satisfaction in having toured the roads of Canada, if they are to come back and recommend others to come, there must be roads, scenery and surroundings that are more attractive than they can find at home. If we can provide these the tourists are bound to come and perform will spend their money. But we want them, not primarily because of their money, but because we like them as visitors amongst us and hope they like us as their temporary hosts.

Practice Fairly Common

But Art Of Tattooing Is Used Mostly By Aborigines

Many people have their arms tattooed in their youth and when they grow older are anxious to get rid of the marks. The cosmetic surgeon does this by retattooing the dark areas with a skin-colored pigment. But people who do not one great country can be named in which the aborigines do not tattoo themselves. The word "tattoo" is from the Tahitian word "tatu," meaning "mark." Blue paint, made by mixing the ashes of coconut with water, was introduced into the Polynesian skin by punctures made with sharp instruments of human bone. The facial designs on the Maoris of New Zealand consist of a person's face, causing the old to look young and the young old. The tattooing of the Haida Indians of British Columbia is said to be the most finely wrought in the world.

Had Him Puzzled

Man Was Unable To Figure Out Weight Of Calf

A farmer took a calf to town in a lumber wagon with wide-tread wheels. He drove onto the scales and weighed the wagon with the calf, and then drove around the yard and unloaded the calf. On his trip back to the scales to weigh the wagon, he had to drive through heavy mud.

After he had driven onto the scales, he waited for a long time for the weigher, who seemed to be puzzled over the result that he was getting. Finally, the farmer, becoming impatient, asked:

"Waal, what did he weigh?"

"By gosh, I dunno! 'Cordin' to my figurin', he weighs sixteen pounds less than no calf at all!"

Made Counterfeit Dimes

Men Stole Table Silver From New York Hotels

The New York mystery of the vanishing hotel table silver was explained by James J. Maloney, of the United States secret service. It was being melted and molded into counterfeit dimes. Maloney said, by two men who stole it while working as bus boys in various hotels. The men, Rafael Almira, 26, and Elpidio Arizgas, 28, passed about 5,000 dimes a month, Maloney said.

Named For Swedish Botanist

The dahlia, a flower native to Mexico and named for A. Dahl, a Swedish botanist, was honored last week by the American Dahlia Society in its annual show held in New York City's Bronx. There were more than 1,000 exhibits in 329 competitive classes. Originally there were ten species of dahlias. Today there are more than 5,000.

SWISS HUMOR

"Why isn't there a warning sign at this dangerous corner?"

"Well, there used to be one, but as no accident ever happened, we took it down."—Sie und Er, Zofingen.

The Queen Mother

Although Past Her 71st Birthday, She Is Anything But Old

Public life in England has many distinguished women to show who have passed three score years and ten, are still in the full flow of their activities, writes Valentine Williams in the London Daily Mirror.

Queen Mary has celebrated her 71st birthday, but it is impossible to think of her as an old lady.

A clever woman said to me once: "Nothing is harder than to grow old gracefully except to remain young becomingly."

It seems to me that Queen Mary succeeds admirably in solving both problems.

Just as she has always risen superior to the measure of sorrow, which Fate has mingled with her share of happiness as Queen, wife and mother, so she has met the onward march of the years without repelling, yet without surrendering to them.

Women of all ages everywhere may well pattern themselves upon Queen Mary. Especially widows. So many women, deprived by death of their life's companion, give themselves wholly to their grief.

They withdraw altogether from the daily round to commune with their sorrow, not realizing that the braver, even the more unselfish, way is to pick up the broken threads and weave them into a new pattern.

This is what Queen Mary has done. She would not allow her personal bereavement to interfere with the fulfillment of her duty as she saw her duty.

As Queen Mother, her life continues as full as ever. Apart from her public duties and family ties, she finds plenty to occupy her—the innumerable good works with which she is identified, the country's welfare in general, the life of today, her personal friends, her hobbies.

Her gracious and vital personality remains unchanged because it is rooted in courage and faith and kindness, and in a mortal world these things are ageless.

Tip For Next Summer

Declaring hot sunshine on a closed car causes suffering and sometimes unconsciousness to dogs inside, the national canine defense league of England has issued an appeal to motorists not to leave their pets in parked cars with all windows closed.

Just His Bad Luck

Too Much Milk Was Fatal To Old Wine Drinker

The idea seems to be prevalent that non-smokers and total abstainers stay the course longer than those who like good living. Nothing could be farther from the truth, for some of the most aged people in history have indulged generously in tobacco and wines. Recently, Mrs. Johanna O'Connor, who, incidentally, smokes a pipe, claimed to be the oldest woman in Ireland at the age of 110. Her claim was indignantly repudiated by Mrs. Bridget Guthrie, of County Clare, who says she is 112, and is also a pipe smoker.

Even excess of wine does not necessarily kill. Paul Parrell, of Doves Farm, Yorkshire, drank ten quarts of ale daily for 64 years, and did not die till he was nearly 80. An even thirstier old fellow was Heinrich VI, Duke of Legnits (Silesia), who quaffed 25 pints of wine every night for 32 years.

His death, according to authoritative sources, was actually caused by an overdose of milk! Which seems bad luck.

Goal Of Scientists

Research Work Being Directed Toward Storing Energy Of Sun

Conversion of the sun's energy into power to operate man's world, or storage of that energy for future use, is the goal toward which research scientists at Massachusetts Institute of Technology will shortly bend their efforts. Dr. Karl T. Compton, president, in announcing receipt of a gift of \$647,700 for the project, pointed out that the sun pours an average of four million calories of heat daily into every square yard of the temperate zones. In the three months of maximum sunshine, he said, each acre of land receives from the sun heat equivalent to that produced by burning about 250 tons of coal. Scientists believe that means can be found through chemical, electrical and mechanical studies to harness this tremendous energy. At Harvard University, research workers are studying the possibility of speeding up growth of trees.—Popular Mechanics.

Piano manufacturers are the world's largest users of ivory. Two hundred thousand pounds of ivory are imported annually for this purpose.

Colorful Panel A Delight To Stitch

PATTERN 6159

The peacock, that most regal of birds, embroidered in colorful wool or silk adds rich dignity to any room. Pattern 6159 contains a transfer pattern of a panel 15 1/2 inches; color chart and key; materials needed; illustrations of stitches.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Sun Now Passing Through Greatest Maximum Of Spot Activity In Modern Times

Dangerous Headlights

Night Driving Said To Be Three Times As Dangerous As Driving By Day

Driving of automobiles at night is said to be three times as dangerous as driving by day.

A large part of the hazard of night driving is undoubtedly due to the glare of approaching headlights from other cars.

While automobiles are now declared to be practically mechanically perfect, there are two respects in which they can be made much safer for the average driver. One necessary invention is tires which are puncture proof, and the other is headlights which cut glare.

Glareless headlights are not only possible, but they have now been developed to the point where they could be placed as standard equipment on cars. By the use of a new type of glass on both car headlamps and car windshields the glare from approaching lights can be eliminated and the beams from the driver's own headlights may reach past approaching cars and distinguish all objects on the road ahead.

Equipment of every car in Canada with the new type headlights and windshields would be essential to eradicate the glare hazard, and it has been predicted that such equipment may be standard equipment in the not too distant future.—Calgary Albertan.

Farming In Wheat

Considered Better Than Mixed Farming For Southern Saskatchewan

Farming in southern Saskatchewan has "definite limitations," but the industry can be successfully carried on in that area, H. Van Vleet, instructor in the farm management department at the University of Saskatchewan, said in a service club address at Saskatoon.

No matter how successfully scientific study was applied to problems of the southern Saskatchewan farmer, it was now realized that farming in the southern part of this province will always be "somewhat hazardous" and that the droughts will recur in cycles.

"In considering the problems of the south Saskatchewan farmer we must bear in mind that wheat is the most drought-resisting crop he can grow, which means that the answer to his troubles is not to be found in a wholesale adoption of mixed farming."

Grasshoppers On Ice

Find Layers Of Insects On Glaciers In Yellowstone Park

A dwarfing glacier near Yellowstone park has revealed blankets of grasshoppers. Dr. Kenneth King, Dominion government entomologist, Saskatoon, told a public meeting of Weyburn district farmers. This particular glacier, as it dwells in size, exposes layers of grasshoppers. These "hoppers," according to Dr. King, lie on the glacier in the course of their migrations, and because dependent on atmospheric conditions for their movements, were unable to leave the glacier later.

Dr. King cited this unusual habit of the "hoppers" to show that the "hopper" had come to the great plains years before present settlers, and most important, had adapted themselves to the country over a long period of time, and would obstinately resist nature or any other agency of man aimed at their destruction.

Red Cap Service

Boy At Chicago Station Did Not Overlook Chance

The New York says Miss Anne Morgan's secretary was on her way home from a vacation in the West and between trains in Chicago dashed off a postcard to her sister. "I hope I made this train," she concluded hurriedly, and handed the card to a Red Cap, asking him to mail it. When her sister got the message, it bore a neat, pencilled postscript: "She made it. Respectfully yours, Red Cap."

Czechs In Canada

It is estimated that at the present time there are about 40,000 Czechs in Canada. The 1921 census reported 30,401 people of Czech and Slovak origin in the country, and several thousands have probably been added to this total since. Of the number at the time the census was taken, 8,871 were in this province, and many of these were in Sudbury and other centres in northern Ontario.—Sudbury Star.

Whatever disturbing effects sun spots may have on the earth, the sun is just passing its greatest maximum of spot activity in modern times.

Records at the Carnegie Institution's Mount Wilson observatory showed there have been more spots on the sun for the past two years than for any similar period since 1870.

"We were inclined to believe the maximum of the normally 11-year cycle had been reached in July, 1937," said Dr. Frederick Seares, assistant observatory director, "until last July and August came along. Now it appears the cycle curve will show a double maximum."

Some persons have attributed the world's unrest, including war and threats of war, and fluctuations in the stock market, to sun spots.

Astronomers, however, are content to charge disruption of telephone, telegraph and short wave radio broadcasts to the solar disturbances and add a possible minor influence on the weather.

Dr. Seth Nicholson reported that the largest spot groups of the present cycle have been among the largest ever observed and the daily average of 9.9 spots for 1937 was the highest in the history of Mt. Wilson. The average for this year so far has been 10.02, but the sun spot activity is declining now and the figure for the year may be under that of 1937.

He said there had been several "very great magnetic storms which caused widespread interference with telephone and telegraph communications" and an "exceptionally bright aurora was observed from Mt. Wilson last January.

The storms in the earth's magnetic field, which cause the aurora borealis to be observed as far south as the Mexican border and hamper telephone and telegraph service represent a slower effect and may follow as late as 26 hours as the appearance of a large sun spot group.

Renown Wheat

Generally Regarded As Most Likely To Replace Marquis

Every thinking man is being made to save for seed every bushel of new rust-proof Renown wheat. This variety, developed by Dominion Government plant-breeding stations, is generally regarded as the most likely to replace Marquis. At one time it was believed that Thatcher, the only rust-proof wheat yet available in commercial quantity, would have that honor.

While Thatcher produces a berry of high quality, its appearance is against it, especially if it has been bleached by the weather. It is considered important to maintain appearance as well as the quality of the wheat exported from western Canada. Moreover, while Thatcher is immune to stem rust, the most dangerous of the varieties of rust attacking wheat, it is not immune to leaf rust, which is capable of doing a good deal of damage.

Renown so far has proved to be immune to any type of rust and produces a kernel of appearance equal to Marquis. It yields half a million bushels of Renown per acre from then on sufficient to supply the needs of all districts where rust is most feared.

Many farmers who grew Thatcher this year, while obtaining fair yields, nevertheless were disappointed in grades though weather and not wheat variety was probably responsible. One result was a good deal of uneven ripening, and the production of a certain number of green kernels in the crop, which had the effect of lowering grades.

Canadian Art

Important Exhibition At The Tate Gallery In London

The most important exhibition of Canadian art ever assembled outside the Dominion was opened by the Duke of Kent at the Tate Gallery in London.

The exhibition illustrates for the first time to Europe the long tradition, cultural evolution and achievement to which Canada owes its claim. Some of the exhibits, notably wood carvings from Quebec, date back to the 17th and 18th centuries. The National Gallery of Canada, the Toronto Art Gallery and the University of Toronto have lent exhibits and a number of paintings are included from the London collection of the Canadian High Commissioner, Vincent Massey.

This exhibition will remain open for two months, after which it may be shown at one or two provincial art galleries.

Help improve your personality with Wrigley's Gum. Keep your teeth white, breath sweet, by using Wrigley's Gum daily—at millimeter do. The children also love the delicious refreshing flavor of Wrigley's Double Mint. Take some home today.

WORLD HAPPENINGS BRIEFLY TOLD

A decree issued in Vienna forbade Jews to attend any public sports events as spectators.

Lord Hawke, 78, famous old-time Yorkshire batsman and noted cricket authority, died in London recently.

The Countess of Ashburnham died at her home in Fredericton, N.B., following a heart attack.

The German government decreed the Reichsmark henceforth would be the legal currency of the Sudeten territory.

Twenty persons were killed when a Belgian airliner lost a wing in mid-air and fell in flames near Soest, in northwestern Germany.

The agriculture department estimated this year's United States wheat crop at 940,229,000 bushels. Corn production was forecast at 2,459,316,000 bushels.

Bones of a giant horse and dwarf buffalo were discovered in South Africa where by scientists seeking further trace of man's purported ape-like features.

Sir Kingsley Wood, British secretary for air, announced establishment of a new 11,000,000 (\$5,000,000) aircraft factory and expansion of existing production facilities for military planes.

D. de Waal Meyer, first accredited representative of the Union of South Africa to Canada, has arrived in Ottawa to assume his new duties. His position is substantially the same as that of high commissioner.

Locates Planes Off Beam

Device Permits Air Base To Immediately Inform Pilots Of Position

The close link between communication and transportation was shown by Dr. F. B. Jewitt, president of the Bell Telephone Laboratories of New York, when in an interview at Toronto he announced development of an instrument which will make possible immediate location of aircraft which have flown off the radio beam they have been travelling.

The device, activated by a cathode ray tube, he stated, shows the location of airplanes in relation to their direction from the point where it is stationed. Although confined to laboratory experiment thus far, its performance have been faultless under the most rigid tests, and he believed it would be widely adopted in the field of commercial aviation if further tests bore out its efficiency.

A quantity of the instruments, he understood, was on order for Trans-Canada Airlines, and he expressed the opinion that, "unless we find some bugs in it," the device would play an important part in assuring the safety of airline ships and passengers.

At present, he explained, pilots who have flown off the beam, particularly in the vicinity of airports, where the "cone" is narrow, have difficulty in learning their positions. The new device consists of a frosted glass "dial" marked off in quadrants of a circle. The moment the lost aircraft begins operating its radio transmitter a spot of light appears on the dial, pointing out the direction of the aircraft from the landing field. The equipment is designed to be housed at the air base.

By using two such instruments, he explained, cross-bearings can be taken on the aircraft and the pilot may be informed almost instantaneously of his exact location.

Doctors and preachers have the same trouble. They can't do much for people who think they know everything.

Ice crystals five to 10 inches in diameter have been found in the Antarctic.

When danger threatens, the parent grebe tucks its young under its wings and dives under water.

A Castle In Wales

Property Of Wm. Randolph Hearst Is Up For Sale

Down in South Wales on a promontory overlooking the Bristol Channel is a beautiful old castle, which has been turned into a most luxurious modern residence. It is called St. Donat's, and it belongs to William Randolph Hearst. He bought it some 13 years or so ago—in a picture he saw of it in an English magazine, it is said—and he spent what would be a fortune to anyone else in modernizing it.

Now he is trying to sell it, having paid to it in the meantime hardly more than half-a-dozen visits of a fortnight or so. It seems a very small return in enjoyment on so vast an outlay.

When Hearst first bought the castle—for something like \$25,000—the Society for the Preservation of Ancient Monuments became rather worried as to what he was going to do with it, for its history goes back to the twelfth century. Its original builders were the Estering family, who came over from Normandy in 1099, hard on the heels of the Conqueror.

These fears as to Mr. Hearst's intentions proved groundless. He made great changes, of course—he had to, to make the place habitable—but even hostile critics had to admit that the changes were in admirable taste. The preservers of ancient monuments should, in fact, be grateful to him. Without him the old castle would probably have become a hopeless ruin.

What Mr. Hearst did was to turn St. Donat's into a superb modern residence, while carefully preserving its features as a medieval fortress. It is wonderfully equipped. There are more than ninety rooms, of which some thirty-odd are bedrooms, each with its bathroom. The huge baronial dining hall seats more than 200. And the whole place is filled with art treasures of every conceivable kind. Moreover, the castle stands in a park of 2,000 acres or more, which contains among other things a private golf course. In the old jousting ground is the finest swimming pool in the whole country.

And all this has been maintained just as if the owner were in residence. The golf course has been mowed and tended, the water in the swimming pool has been kept at the same temperature winter and summer, even the log-fires have been flamed and smoldered in the huge, ancient fireplaces. All ready, and all waiting, but, except for the caretakers and guardians, as silent and empty as an enchanted castle in a fairy-tale. It is one of the queer fantasies of vast wealth—P. O. D. in Toronto Saturday Night.

Goa, Portuguese India, has the world's cheapest stamps. They sell for 12 for a penny, and the purchaser must supply his own mucilage.

It is said that our intelligence ceases to grow at the age of 14 and begins to decline at the age of 35.

Fresh vegetables retain their vitamins and their sugar better if kept in a cold place.

Turtles are unable to hear high-pitched tones.

There are approximately 3,500,000 dogs in England.

Here's Quick Portable HEAT from Low Cost COAL OIL!

COLEMAN RADIANT HEATER

Makes and burns own gas from "coal oil." Fuel cost less than 2¢ an hour. Radiates a flood of clean, healthful heat. Ideal for chilly autumn and spring days or as an auxiliary heater all winter long. See dealer or write . . .

A JUMPER FROCK THAT'S NEWS

By Anne Adams

"What's the most popular juvenile fashion?" The answer, of course, is **Jumpers**. And THIS is the newest, sweetest edition of them all. Get an order in for Anne Adams Pattern 4859 immediately, and you can make up several versions in time for school days. There's a Sewing Instructor included that explains systematically what to do and when—so it's simple to stitch up this jaunty, panel-type jumper, and double for the classroom, choose warm flannel or serge. Daughter will beg for plenty of cotton blouses to be "changeabouts!"

Pattern 4859 is available in girls' and junior sizes 6 to 16. Size 12 jumper, takes 2 1/4 yards 36 inch fabric; blouse, 1 1/4 yards 36 inch fabric and 3/4 yard ribbon.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg, Newspaper Union, 175 McDermott Ave. E., Winnipeg.

About one-half of the population of Canada is found south of the northernmost point of Minnesota.

According to scientists the human heart contracts 100,000 times daily.

THE WAR IN CHINA — FORMER REBELS NOW LOYAL

Life with the Eighth Route Army in Hopei is illustrated in this photograph. The Eighth Route Army was formerly the Communist Army which waged war against the Central Chinese Government for ten years, but in the face of the danger from Japan joined the service of General Chiang Kai Shek. To stimulate the spirit of resistance against Japan, the Eighth Route Army holds meetings similar to the one in the photograph.

Money Was Not Wasted

Britain Does Not Regret Millions Spent On Preventing War

It is reported from London that the British Government spent £40,000,000 (\$200,000,000) on military preventive measures during the Sudeten crisis. The public felt that the money was not wasted.

In one respect it was. On the surface there is nothing to show for it. Yet the expenditure of that sum probably prevented a war which would have cost billions of dollars; that might have drained the national treasury and emptied the pockets of every man, woman and child in the country; that would have left the country so economically flat that it might not recover for a hundred years.

The preliminary preparations for war cost the country \$200,000,000 without a shot being fired. Over a term of years the Great War cost Britain \$5,000,000 a day. Similar preparations must have cost France, Russia, Czechoslovakia and a number of small adjacent countries several hundreds of millions in the aggregate. But it was money well spent. On one side was an array of forces which would have struck with terrible effect if the nations on the other side had not matched it with even greater forces. The result was the countries threatening war were afraid to strike and there was no war.

Yes, the money spent by the non-aggressor governments was well spent.—St. Thomas Times-Journal.

Cheewing Gum

Now An Integral Part of Royal Air Force Rations

Cheewing gum which started British jaws clicking secretly years ago has been dignified as an integral part of the Royal Air Force emergency rations and a muscular stimulant used by long-distance flyers to keep them alert.

The exhibit appears in the British Honduras Court of the Institute's display, mainly because the raw material, chicla from the bully tree, is the colony's second most important export. Mahogany is first.

The exhibit, using photographs and samples, traces the evolution of the gum habit from its source in the dark forests of tropical Honduras to people. Local experience has verified the truth which Isaiah prophesied, that there are few things which man can do more readily than reward than this one of turning this one day in seven to the highest purpose for which it was intended. To render unto God his due will be to serve our own best and holiest interests.

Gum chewers can be seen in London's streets, but the British chewer doesn't snort it.

An economist remarks that "the trend of modern invention is to make work lighter. Personally, we would like to hear of one that will make a lighter work."

Erosion has changed the surface of the earth more than the combined effects of earthquakes, volcanoes, tornadoes, landalsides and glaciers.

An astrologer in London declares he has devised a system of backing race horses by the stars.

SUNDAY SCHOOL LESSON

OCTOBER 23

OUR DAY OF REST

Golden text: Remember the sabbath day, to keep it holy. Exodus 20:8.

Lesson: Exodus 20:8-11; Isaiah 58:13, 14; Luke 13:10-17; Galatians 4:8-11; Colossians 2:16; Revelation 1:10.

Devotional reading: Psalm 81:1-4.

Explanations and Comments

The Fourth Commandment: Remember God's Day, Exodus 20:8-11. The root meaning of the word rendered hallowed in verse 11 is to separate; the Sabbath day is to be separated from other days in the way it is spent.

Six days shalt thou labor, and do all thy work. There are many persons whose difficulty in keeping this fourth commandment lies right here—they are too lazy to work the six days. The commandments lay stress on working as well as upon resting. "Every man is as lazy as he dares to be" is an oft-repeated saying which we share without some measure of truth. "Life without industry is sin," declares Ruskin. The tragedy of a life is that time is not felt to be a trust for whose use one must render account.

The seventh day is to be distinguished from other days by abstinence from labor. "The Sabbath was made for man, and not man for the Sabbath," as we learned in a lesson of the first quarter.

The reason given here for the distinction to be made between the first six days and the seventh is that God himself labored at creation for six days and rested the seventh day: "Wherefore Jehovah blessed the seventh day and hallowed it," separated it from other days for special holy purposes. The day should recall to mind thoughts of God, the Creator and the duty of striving to be like him. Another reason is given in Deuteronomy 5:15: there the necessity of allowing other people to rest from their work is stressed on the ground of gratitude for God's deliverance of his people from their slavery in Egypt.

Messages of Sabbath-keeping. Isaiah 58:13, 14. The prophet is sure that Sabbath-keeping will lead to prosperity, and he bases his plea for its observance upon its Godward aspect, as an act of homage to Jehovah. The argument stands thus: One day out of seven is surely not too much to give to God nor to devote to the purpose of rest and worship, and an endeavor to come to a further understanding of life and duty. For we are giving more time to these matters life has become soiled and well-nigh meaningless to multitudes of people. Long experience has verified the truth which Isaiah prophesied, that there are few things which man can do more readily than reward than this one of turning this one day in seven to the highest purpose for which it was intended. To render unto God his due will be to serve our own best and holiest interests.

A Paying Venture

Farmer Figured Up How Cat Saved Money

An article by Lois M. Marnon in "Our Dumb Animals" says several years ago a tenant farmer moved on to a place overrun with mice and rats. Not only the house but the fields were full of them, and a walk through the fields a dozen mice could be seen in a few minutes' time. In the house it kept the man and his wife busy setting and re-setting mouse traps—especially of an evening.

Finally, in self-defense, the farmer got a male kitten from one of his neighbors. The kitten was given good meals regularly, treated kindly and given good training. On going to the fields the farmer would take the kitten with him to nose around in mousey places. From the first the cat proved a good hunter.

The farmer figured the cat for six years now, and the other day he figured up just how well the cat had repaid them for a good home. Making a very close estimate, based on 2,000 days, of the number and kind of pests kitty had caught and what each pest living would have cost the farmer in grain, destruction to buildings, fields, etc., he found out that it amounted to a total of \$805, or a little over \$124 a year. That is what it paid this farmer to keep a cat.

Wear Distinguishing Badge

Policemen of Ostend, Belgium, who speak English will hereafter wear a miniature Union Jack on the left arm. The innovation was made primarily to help British tourists, but the officers will assist all other officers who speak Flemish only.

The summit of Mount Everest, highest point of land in the world, would be one and one-fifth miles under water if placed in the deepest part of the ocean.

According to a weekly paper, castor oil comes from the castor bean. Even so, what Smith Minor really wants to know is, Why?

Orchid seeds are so tiny that hundreds of them could rest on a pin head.

Turkey has constructed 1,940 miles of railways and 70 bridges since 1925.

Sir Horace Wilson

The Man Who Took A Hand In The European Crisis

In days of apologetic European diplomacy a mild little man, immaculately dressed, sat beside Neville Chamberlain in the fateful councils of the British Cabinet and at times flew to Germany as the Prime Minister's personal emissary to Adolf Hitler.

The role of Sir Horace Wilson has been somewhat mysterious since he was drafted two years ago for "personal service to the Prime Minister." Political circles say that "personal service" now includes foreign affairs and that the "mysterious H. J." is Chamberlain's most influential adviser and "personal brain trust." And it's common talk that the blue-eyed, round-shouldered little man of 66 has taken a hand in the Central European crises.

Sir Horace entered the civil service in 1903 at 180 a year. He was not a university man and apparently would stay in the "second division" all his life. But he was noticed by a former industrial commissioner who got him a place in the new Labor ministry in 1916. Wilson made a record as a strike mediator.

Shortly after the close of the war, an important strike drew comment from Prime Minister Lloyd George. "What happened to our strikes breaker?" the Prime Minister inquired.

Told that Wilson wasn't working on strikes, Lloyd George changed his mind. In 1921, Wilson became permanent secretary of the Ministry. In 1924 he was knighted.

He became known as the mildest, most patient labor mediator in history. Both workers and employers liked him. When the depression came, Prime Minister Ramsay MacDonald made him chief industrial adviser.

Sir Horace then sweated through problems of foundering industries; got them more capital if he felt them to be deserving. He moved colonies of workers to more prosperous towns. Then Neville Chamberlain brought Sir Horace to No. 10 Downing Street, the middle of the Empire. When Mr. Chamberlain became Prime Minister, Sir Horace was at his right hand.

"Meandering land" is the land bordering rivers or lakes with irregular shores which are likely to change in time.

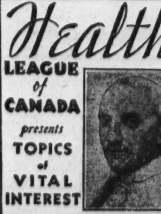

Mrs. Grover Cleveland received the first parcel post package in the United States.

Phasmids, curious insects of New Guinea, blend with their surroundings, camouflaged as leaves.

Because of the relative lack of friction on water, wind travels faster over water than over land.

CHAPTER V.—Continued

"Once we find that old river bed," he said. "But where will you find it?"

"That's the problem. There's nothing to indicate where it might be. We're sure it's there, somewhere. But that's all we know."

"Then it's like looking for the proverbial needle."

"Just about," Jack agreed. "We'll just have to keep on putting down test holes; one of them may turn out."

"Isn't that rather silly?"

Hammond shrugged his shoulders. "All we can do is follow Joe's hunches—as to where he thinks the river should have run. Of course, other persons might go at it scientifically."

"And find what they were looking for?"

"Perhaps."

"Then why don't you?"

"You don't know Joe's breed. They distrust scientists. Any old prospector will tell you that an engineer or geologist can ruin the finest mine ever discovered. Oh, they're funny!"

Kay tossed her head.

"I can't see anything funny about it. Why should you give up everything in life just because your partner is—what do you call it—bushy?"

"But he's my partner, Kay! We've fought the North together."

"That's carrying chivalry too far. You'd both be better off with scientific help."

"Of course we would, Kay. But I couldn't sell Joe that idea in a month of new moons. And he'd rave if he found out that I went after advice myself. Besides, where would I go—where I knew I could be safe?"

She looked up.

"You haven't thought of Bruce Kenning?"

Hammond's eyes widened.

"No, I hadn't."

"My father trusted him for years and wasn't sorry. He did all that work down in Peru and Bolivia." She added bitterly: "We wouldn't be penniless now if he had listened to Bruce." Again there was silence. At last Kay clenched her hands and walked to the ledge. Slowly Jack followed, entranced by the picture of her in the moonlight. "I wish I could talk to that partner of yours."

"You'll change your mind when you meet him. Might as well argue with a tree stump."

"But why bother with him?"

"Kay! He's my partner."

"Oh, I didn't mean that. Why not get your advice and know where you're going, instead of staggering around blindly. Doesn't it amount to just that?"

Mathieu's Cough Syrup

"In a way."

"It seems guidance would help both of you. A geologist could figure where that river ran a thousand years ago."

Hammond spoke slowly. "Maybe that's an idea, Kay."

"And you can trust Bruce to the limit. Father did. As for the fee, I'll see that he doesn't charge you anything until after everything is over." She laughed. "He'd know better. I'd say him if he put in a bill."

"McKenzie Joe would have to stay in the dark. He'd kick over the traces."

"Why tell him anything? Look here, you're digging now at random, aren't you?"

"Just about."

"Then couldn't you just accidentally dig where Bruce told you to look?"

"That's an idea too!"

"Then why don't you? You owe it to yourself. And Joe too. He'd benefit as much as you."

He could think of little except that Joe was close to him, vibrantly warm, that her hair brushed his cheek, that a soft hand stroked his throat.

"I'll have to be terribly quiet about it," he said at last. "Maybe it'd be better if you'd sort of pave the way to Kenning. Don't tell him too much—just enough so that he'll know what I'm talking about when I see him."

"I will, dear," said Kay Joyce softly. For a deliciously long time, she remained close to him. Then slowly she drew away, at last to become solitary, somehow lonely, as she looked out over the valley.

"Jack," came after a long time. "I've a disappointment." Then with jerky abruptness, "We can't be married."

"But Kay, that's impossible!"

"Please don't ask me a lot of silly questions about not loving you, the girl said crisply. "I can't stand it."

Instantly he was beside her.

"What are you trying to say?"

"Nothing—of consequence. I'm just terribly unhappy, Jack."

"But why? You say you're crazy about me. You know I worship you."

"She came over you, Kay?" he begged. "That night in Seattle—"

"Can't you understand? Mother and I are broke, positively flat broke!"

"The whole psychology of the camp had changed, while hardware and furnishing stores in Wrangell sold out their supplies and the hurrying airplanes roared onward to Junction and Sitka, there to load up from new sources and rush back to the mining camp."

"Yes," said McKenzie Joe, as he watched a ship drop to the lake and taxi to a landing, "everybody's in a hurry. They could go for months without glass in their windows—but now they've got to have it by the next plane. That's the trouble with a new gold digger. Nobody wants to let it stay the way you found it."

Then suddenly he asked Hammond, "You going to work with me today on that upper shaft, or are you still sticking to Loom creek?"

CHAPTER VI.

All in less than two weeks, the little settlement of Sapphire Lake had become a village—and was robustly looking forward to the day when it would be a town. Timmy Moon's airplane had caused it.

Not that he'd longer held the monopoly. Two days after his first trip into Wrangell, another geyser had begun to flow from the Alaskan coast and begun a canvass of the town for business. Timmy had found his way up from Vancouver.

For days Timmy Moon had been chartered by Around the World Annie, feverish for artiana, woodworkers, glaziers and their supplies. Olsen's discovery of gold had done great things for the morale of the camp. Other placer miners, who had been content with mere panning, now were building rockers, or going in for greater sluicing operations.

The whole psychology of the camp had changed, while hardware and furnishing stores in Wrangell sold out their supplies and the hurrying airplanes roared onward to Junction and Sitka, there to load up from new sources and rush back to the mining camp."

"Yes," said McKenzie Joe, as he watched a ship drop to the lake and taxi to a landing, "everybody's in a hurry. They could go for months without glass in their windows—but now they've got to have it by the next plane. That's the trouble with a new gold digger. Turner Valley Oil

Now Greater in Empire Importance Since Oil Field Seizure in Mexico

Canada's oil fields at Turner Valley, Alberta, had developed greater Empire importance in view of the expropriation of British oil companies' property by the Mexican government. Viscount Chaplin told reporters before he sailed for England in the liner Empress of Britain.

"That trouble in Mexico has brought Canada's western oil into a much more prominent place, both from a Canadian and Empire point of view," the visiting British peer said. "It is a young concern yet but will go a long way."

Viscount Chaplin, himself interested financially in the western oil fields, Alberta, had developed greater Empire importance in view of the expropriation of British oil companies' property by the Mexican government. Viscount Chaplin told reporters before he sailed for England in the liner Empress of Britain.

Made First Parachute Leap

English Aeronaut Jumped From Balloon At Height Of 9,000 Feet

One hundred years ago an English aeronaut named Hampden made what was the first real parachute leap in history. Ascending in his balloon at Cheltenham, he jumped from a height of 9,000 feet and landed gently thirteen minutes later.

The first mention of a parachute device was in 1785, when a Frenchman named Francois Blanchard descended from a balloon. The records are somewhat obscure and it is not known whether the parachute was of his own invention or that of another Frenchman named Etienne Montgolfier. There is little record of parachute leaps, however, until Hampden's adventure, which caused a great sensation. For a long time parachute jumps were mere "stunts" and indeed as these devices are made more efficient and science helps the leapers with oxygen apparatus, plus the daring of those who, either for the thrill of the thing or for money, they are still "stunts" at fairs and exhibitions.

The World War not only gave a great impetus to aviation but brought out the value of the parachute as a means of saving lives. The men who went up in observation balloons were frequently set on fire or so damaged that they began to collapse. On these occasions the observers "baled out," and records show that out of about 600 parachute leaps there were only three fatalities. These may have been due to the same cause that cost the life of Basil Hallam, revue idol of London and fiancé of Elaine Janis, who, forgetting that he was wearing an old type parachute that did not act like a chair in which to float down, slipped through the harness and crashed to the ground.

Toward the end of the war parachutes were supplied to the men in airplanes and another 200 lives were saved in that way. Today parachutes are part of the equipment of all planes and thousands of lives have been saved by them.—St. Thomas Times-Journal.

Modernize Your Home At Low Cost

Install a Johnson Chore-Horse and enjoy the comforts of Electric Light and Power. Don't waste longer the greatest of all conveniences. No matter where you live, regardless of wind and weather, you can now have the modern home you have always wanted. Flood homes, yard and buildings with Brilliant Electric Light. Have ample power instantly for your Radio, for Charging Batteries, for water pumping and to operate chiller, separator, miller, washing machine and many other appliances. Save time, labor and money and at a cost you would hardly believe. Electric Light. Send for FREE folder, today, and plan your modern home.

CHORE-HORSE MODELS AS LOW AS \$69.50

Built by the manufacturers of the world-famous Gas-Horse. Outboard Motors, the Chore-Horse is the last word in advanced design and precision construction. Light and compact for portability. Sturdy and strong for years of trouble-free service. Simple and easy to install. Its positive operation makes it instantly available. Low in initial cost and most economical in operation. Johnson models range in capacity from 150 watts to 800 watts. . . a size to meet every requirement for rural and suburban homes.

Write today for FREE copy of illustrated folder. Investigate every claim made for the Chore-Horse and learn how simple and inexpensive it is to equip your home with brilliant Electric Light.

Johnson Motors 600 Monaghan Rd. Peterboro, Canada. A Canadian Product With Sales and Service Across Canada.

A Real Menace

Foul Air Like Impure Water Causes Many Diseases

The day is near when we will be told that the breathing of unconditioned air is as dangerous to health as the drinking of unfiltered, untreated water. Men had to learn to wash their bodies and to live in clean and wear clean clothes. The bubonic plague, which almost swept Europe were the consequence of filth. More recently typhoid fever killed tens of thousands until we learned about pure water.

Foul air today, so it is said, plays millions. The infections from bad air include tuberculosis, bronchitis, pneumonia, influenza, and the common cold. Other such infections are asthma and hay fever. Clean air of the proper temperature and humidity may reduce the prevalence of these diseases until they are almost unknown.—Parade.

Miss Anne Cameron returned
from Banff last weekend, where she
was employed for the summer.

Messrs. J. and K. L. Gilchrist
were Calgary business visitors last
Thursday.

Miss Olive Stauffer spent Sunday
at Calgary, visiting her friend, Miss
Alma Gordon.

Miss Gerrie Sharp, who recently
underwent a tonsil operation, will
resume her duties at Carstairs.

Miss Agnes Baker, of Calgary, is
again on the staff of the Oliver
Cafe.

Mr. and Mrs. I. T. Davis moved
to their new home in Drumheller
on Sunday.

Miss Helen Sharp, of Carstairs,
will spend some time at her home,
owing to ill health.

Miss Wilda Laur, Rev. Hunt and
Messrs. Harold Hunt, Charlie Laur
and others attended a banquet at
Olds Wednesday night.

Mr. Stuart Walker of Kenley
Jersey Farm, recently sold three
pure-bred Jersey cows to Mr. Harry
Tucker of Springbank, Calgary.

Miss Phyllis Ainscough was at
Calgary last weekend, where she
was the guest of the Misses Ane
Aaskow and Dorothy Ingham.

Look! A Big Dance, sponsored
by the Board of Trade, will be held
in the U.F.A. Hall, Crossfield, on
Friday, October 28th, Trainor's
Orchestra.

Seen in Calgary last Saturday: Mr.
and Mrs. H. R. Fitzpatrick, Mrs. W.
Emerson and Lewis, Mrs. Ernest
Ainscough, Mrs. Edward Fox and
son Mervin, Mrs. Wiele, Miss
Fanny Gough.

J. Hesketh returned Thursday
last after spending some time in the
hospital at Calgary. He has rented
his meat market at Arrowood and
is moving his family to Crossfield
the end of this month.

Mrs. F. Stevens, Mrs. Blough, Mr.
and Mrs. Sid Jones, Mr. and Mrs.
G. Murdoch, Mrs. Joe Fike, Alfred
High, Doug Fleming and Miss Phyl-
lis Ainscough, E. Landymore and
Rev. A. D. Currie were Calgary vis-
itors last Friday.

Mr. Adolph Mueller, O. H. G.
who has spent the summer working
at the L. J. Smith farm, leaves this
week for Hepburn, Sask., where he
will attend the Bethany Bible Col-
lege.

Mr. and Mrs. C. C. Stafford
moved into the house recently vac-
ated by Mr. and Mrs. J. T. Davis
on Monday. Mr. Stafford pur-
chased this house from Mr. Davis
last spring.

W. A. Hurt is building a Weld-
ing and Machine Shop next to the
W. J. Wood Garage, and the M. D.
of Rosebud office is having a new
roof built. W. Emerson is supply-
ing the lumber for both and Mc-
Caskill Bros. are doing the work.

Among the Crossfield people
noticed at the Fowl Supper, held at
Madden, were: Mr. and Mrs. T.
Tredaway, Mr. and Mrs. Fitzpatrick,
Mr. and Mrs. J. Bishaw, Mr. and
Mrs. D. W. Carmichael, the F. Laur
boys, Richardson boys, Mr. and Mrs.
G. Murdoch and family, Rev' and
Mrs. Hunt, Miss Brown, Miss Gough,
Archie Green, Mr. and Mrs. N. G.
Tweedie, Mr. and Mrs. W. J. Wood,
Corporal Cameron.

Local and General

Mr. and Mrs. Bannister are
brightening their home with a new
coat of paint.

The United Church Ladies are
sponsoring a concert to be given
by the Crescent Heights Concert
Party on Monday, November 7th.

Mrs. P. I. McAnally and Mrs.
Smith left Wednesday noon for
Thamesville, Ontario, where they
will spend the winter months with
their friend, Margaret Featherstone.

The World of Wheat
By H. G. L. Strange

The whole world has had a mir-
aculous escape from a devastating
war. Had war occurred, millions
of lives would have been lost, and
billions of dollars worth of property
would have been destroyed. The
danger came because of the deter-
mination of Germany to acquire
new lands.

A study of Hitler's books and
speeches, however, and of matters
underlying worldwide economy,
convince me, at least, that the
real motive actuating the aggres-
sion of Germany, Italy and Japan
is simply that of a desire to secure
the essential foodstuffs and raw
materials necessary for the welfare
of their people, and which products
today are denied them, in the quan-
tities they need, by the high tariff
policies of the democratic countries
of the world.

The way to satisfy Germany and
the other "have-not" countries, and
so to avoid war in the future, in my
humble opinion, is simple. It is to
reduce existing high tariffs, and so
permit the exchange of more raw
materials and foodstuffs of the
farmers for more of the goods and
commodities of the world's industri-
al workers.

IN MEMORIAM.
FRED STEVENS

Not just today but every day,
In silence we remember
THE STEVEN'S FAMILY

**50
OLD RADIOS
WANTED**

FOR a limited time only, we
offer you an attractive price

Madden Murmurs

From Our Own Correspondent

Miss Dorothy Ingham, who has
been at the home of her parents for
the last few weeks, returned to
Calgary.

Mrs. A. Swanby visited for a few
days last week at the home of Mrs.
C. Ni-Ison, Crossfield.

Miss Ollie Godlington of Calgary
was a weekend visitor at the home
of Mr. and Mrs. H. Walsh.

Misses Isabel and Kate Leach
spent the weekend at their home.

Mrs. J. McEachern of Airdrie is
visiting at the home of her daughter,
Mrs. Lloyd Havens.

Miss Fredrick Smiley, who is at-
tending Carstairs High school, spent
the weekend at her home here.

Friends of Mr. A. J. Rach will
be sorry to hear that he is in the
Holy Cross Hospital, Calgary.

The Madden Chicken Supper
held on Friday, the 14th, was a
decided success.

Remember the Dog Pound

Ladies Annual Fowl Supper
and Dance, to be held next
Wednesday, October 26th, in
the New Dog Pound Com-
munity Hall. Bigger and
Better than ever.

**WORKERS FOR
WORLD PEACE**

Although we follow with our hopes and our prayers the
efforts of the many sincere workers for peace in the world
today, we sometimes wonder why such endeavor should
be necessary. We feel sure that the average man and
woman in other countries are like ourselves. They want
no war.

Has it occurred to you that many of these peoples, peace
loving though they may be, are deprived of the information
that would enable them to choose wisely their course of
action? Instead of news they are given propaganda. The
facts are colored or misrepresented or suppressed. They
have been robbed of the right to think for themselves.

Perhaps a permanent peace could have no better prac-
tical foundation than a free press throughout the world. We
who have free access to all the news, take it for granted and
treat it lightly. Yet, having this pledge of freedom, we
should cherish it, bringing our children up in the knowledge
and appreciation of this safeguard to their liberties.

Use your opportunities to be fully informed on all mat-
ters that affect your life. Give your family the benefits that
a good newspaper can bestow.
